Crispy!

History of Nori (seaweed)

It has been used as a gift since ancient times, and around 800 A.D. (Heian period), it was prized as a gift for the upper classes and as a vegetarian cuisine at temples. Iwagi moss was included in the catalog of specialty products from various countries in Japan, published from 1680 to 1704 A.D. , the name of shinagawa moss is written on it. seaweed cultivation began between 1716 and 1735.

seaweed is a healthy food known as a "sea vegetable" that contains a good balance of vitamins, minerals, iron, and calcium, and is low in calories and rich in dietary fiber. vitamins help the body function normally; polysaccharides promote protein synthesis, increase the immunity of cells and body fluids, and keep blood thin; choline is necessary for communication between nerve cells; you can also effectively ingest ingredients that tend to be lacking, such as calcium, which strengthens your teeth.

sriracha flavor is the most popular in America. Hot and spicy seasoned seaweed tempura.
